

AstroLink · Gemini XPRIZE Submission Package

AstroLink · Build with Gemini XPRIZE

2026-08-07

CONTENTS

Build with Gemini XPRIZE — Submission Package Checklist

1. Competition frame (what judges score)

1.1 Stage One — pass / fail viability

1.2 Stage Two — equally weighted criteria

2. Devpost form fields — master map

2.1 Project identity

Checkbox — identity

2.2 Written description (500–1000 words recommended by orientation sessions)

Structure (paste into Devpost)

Checkbox — narrative

2.3 Revenue evidence (BLOCKER for top prizes)

Checkbox — revenue pack

2.4 User evidence

Checkbox — users

2.5 Product running evidence (AI-Native)

Checkbox — AI ops evidence

2.6 Organization / team

3. Product fact sheet (for judges and video)

3.1 One-liner

3.2 Category thesis

3.3 Stack (submission “Built with”)

3.4 AI agents (production)

3.5 Paid surfaces (business model)

3.6 Public product routes (demo map)

4. AI-Native Operations checklist (score driver)

4.1 Production lock (do before any evidence export)

Checkbox — production lock

4.2 Decision log export procedure

Checkbox — T8

4.3 Golden path for video (AI visible on screen)

Checkbox — video production

5. Business Viability checklist (score driver)

5.1 Revenue table (fill before submit)

5.2 Unit economics (short narrative)

Checkbox — viability story

5.3 User & GTM evidence

Checkbox — GTM

6. Category Impact checklist

Checkbox — impact

7. Eligibility & compliance gates

Checkbox — legal/eligibility

8. Judge testing package

8.1 Credentials & mode

8.2 Golden path script (copy into Testing Instructions)

Checkbox — testing pack

8.3 Internal rehearsal (before submit)

9. Repo & engineering readiness (support, not a scoring criterion)

Checkbox — repo hygiene for judges

10. Submission pack folder layout

Checkbox — pack completeness

11. Priority backlog (what to do next)

BLOCKERS (do first)

HIGH (strong runner-up / category prize)

MEDIUM (polish / risk reduction)

LOW (post-submit or nice-to-have)

12. Final submit-day checklist (print this page)

13. One-page score self-audit

14. Quick reference — key links & code

15. Owner assignment (fill in)

Build with Gemini XPRIZE — Submission Package Checklist

Project: AstroLink

Version: 0.12.0.0

Category: Professional Services Access

Competition: Build with Gemini XPRIZE (\$2M pool)

Devpost: https://xprize.devpost.com/SMARTPANTS_PRESERVED_94SMARTPANTS_PRESERVED_95SMARTPANTS_PRESERVED_96Rules:SMARTPANTS_PRESERVED_97https://xprize.devpost.com/rulesSMARTPANTS_PRESERVED_99 · https://www.geminixprize.com/rulesSMARTPANTS_PRESERVED_101SMARTPANTS_PRESERVED_102SMARTPANTS_PRESERVED_103Production URL: https://astro-link.spaceSMARTPANTS_PRESERVED_106SMARTPANTS_PRESERVED_107SMARTPANTS_PRESERVED_108Code repository: https://github.com/CarlosPHernandez/AstroLinkSMARTPANTS_PRESERVED_111SMARTPANTS_PRESERVED_112SMARTPANTS_PRESERVED_113 Checklist date: 2026-08-07

Submission deadline: 2026-08-17 · 1:00 PM Pacific Time

Judging period: 2026-08-18 – 2026-09-15

Winners announced (approx): 2026-09-25

Status legend

<u>Mark</u>	<u>Meaning</u>
<u>DONE</u>	<u>Artifact exists in product/repo and is usable</u>
<u>PARTIAL</u>	<u>Built in product, packaging or evidence incomplete</u>
<u>TODO</u>	<u>Required for submission; not ready</u>
<u>BLOCKER</u>	<u>Blocks Stage One / Stage Two credibility if missing</u>
<u>N/A</u>	<u>Not applicable unless conditions apply</u>

Use this document as the single ops checklist for the Devpost submission. Checkboxes are operational: check only when the evidence file is saved in the submission folder (see Section 10).

1. Competition frame (what judges score)

1.1 Stage One — pass / fail viability

<u>Requirement</u>	<u>Status</u>	<u>AstroLink evidence / action</u>
<u>Fits theme: business that operates with AI</u>	<u>DONE</u>	<u>Paid expert marketplace with production agents</u>
<u>Fits a category</u>	<u>DONE</u>	<u>Professional Services Access</u>
<u>Uses at least one Google Cloud product</u>	<u>PARTIAL</u>	<u>Gemini API (@google/genai); Stitch used for Chris campaign design. Confirm Gemini calls in production logs.</u>
<u>Gemini used for ≥1 LLM call in deployed app</u>	<u>PARTIAL</u>	<u>Code path exists; must prove production provider: gemini in audit export</u>
<u>Project newly built in Submission Period (from 2026-05-19)</u>	<u>PARTIAL</u>	<u>Document pre-existing scaffolds vs contest-period work in submission text</u>
<u>Working product URL for judges</u>	<u>DONE</u>	<u>https://astro-link.spaceSMARTPANTS_PRE-SERVED_239 (+ judge test credentials package)</u>
<u>Repo accessible to judges</u>	<u>PARTIAL</u>	<u>Repo exists; if private, share with testing@devpost.com and judging@hacker.fund</u>

1.2 Stage Two — equally weighted criteria

<u>Criterion</u>	<u>Weight</u>	<u>What wins</u>	<u>AstroLink posture</u>
<u>Business Viability</u>	<u>1/3</u>	<u>Real arms-length revenue, real users, sustainable model</u>	<u>PARTIAL — product can charge; revenue evidence pack not assembled here</u>
<u>AI-Native Operations</u>	<u>1/3</u>	<u>AI live in production executing key decisions continuously</u>	<u>PARTIAL — multi-agent stack + T8 export code; need volume + Gemini lock + screenshots</u>
<u>Category Impact</u>	<u>1/3</u>	<u>Redefines access or credible path to widespread adoption</u>	<u>PARTIAL — vertical thesis strong; scale/roster still early</u>

Grand prize reality: feature completeness is not enough. Arms-length GMV + continuous AI decision evidence + a clear 3-minute story decide top ranks.

2. Devpost form fields — master map

Complete every field on “Enter a Submission.” Save evidence under docs/xprize/submission-pack/ (create at fill time).

2.1 Project identity

<u>Field</u>	<u>Required</u>	<u>Status</u>	<u>Draft / source</u>
<u>Project name</u>	<u>Yes</u>	<u>TODO</u>	<u>AstroLink</u>
<u>Tagline (short)</u>	<u>Yes</u>	<u>TODO</u>	<u><i>Book verified aerospace experts. AI runs match, prep, session synthesis, and translation.</i></u>
<u>Category</u>	<u>Yes</u>	<u>TODO</u>	<u>Professional Services Access</u>
<u>Built with (tools)</u>	<u>Yes</u>	<u>TODO</u>	<u>Gemini API, Google Stitch (design), Next.js, Supabase, Stripe, Daily, Vercel, Resend</u>
<u>Cover image / gallery</u>	<u>Yes</u>	<u>PARTIAL</u>	<u>public/og/ , design/og-cards/ , expert portraits; pick 3–5 clean screenshots</u>
<u>Website URL</u>	<u>Yes</u>	<u>DONE</u>	<u>https://astro-link.spaceSMARTPANTS_PRESERVED_400SMART-PANTS_PRESERVED_401</u>
<u>Demo video URL</u>	<u>Yes</u>	<u>TODO</u>	<u>≤3 min on YouTube/Vimeo/Youku, public</u>
<u>Code repository URL</u>	<u>Yes</u>	<u>PARTIAL</u>	<u>https://github.com/CarlosPHernandez/AstroLinkSMART-PANTS_PRESERVED_422 — verify judge access</u>
<u>Testing instructions</u>	<u>Yes</u>	<u>TODO</u>	<u>Judge account, golden path, env notes (Section 8)</u>
<u>English materials</u>	<u>Yes</u>	<u>DONE</u>	<u>Product + docs in English</u>

CHECKBOX — IDENTITY

- ☐ Project name finalized on Devpost
- ☐ Tagline ≤ ~120 characters, category-aligned
- ☐ Category set to Professional Services Access (only one prize eligible)
- ☐ Cover image uploaded (1920×1080 or platform default)
- ☐ Gallery: landing, Path Assessment, booking, dual brief, session/captions, recap, decision-log export
- ☐ Production URL live and HTTPS healthy

- ☐ [Repo public or private shared with testing@devpost.com](#) + [judging@hacker.fund](#)
- ☐ Testing instructions pasted (credentials + path)

2.2 Written description (500–1000 words recommended by orientation sessions)

Judges want: problem, who pays, how AI runs the business, category relevance, traction.

STRUCTURE (PASTE INTO DEVPOST)

1. **Problem** — aerospace expertise locked in networks and conferences
2. **Solution** — bookable verified operators + full session OS
3. **Who pays** — mentees / operators / analysts; experts earn
4. **AI-native operations** — APX agents table + “decisions, not chat”
5. **Google stack** — Gemini production + Stitch design
6. **Traction** — users, revenue (arms-length), languages, sessions
7. **Category impact** — Professional Services Access for high-stakes domains
8. **What’s next** — roster, Connect payouts, bilingual scale

CHECKBOX — NARRATIVE

- ☐ Draft written (source: README Gemini section + this checklist Section 3)
- ☐ No overclaim of auto-match if most bookings are direct-pick
- ☐ Related-party revenue not mixed into “customer” claims
- ☐ Pre-existing templates/boilerplate disclosed if any
- ☐ Peer review: non-engineer reads and restates the business in one sentence

2.3 Revenue evidence (BLOCKER for top prizes)

Official requirements:

Item	Required	Status	How to produce
Total revenue (USD), hackathon period	Yes	TODO	Stripe Dashboard → Payments / balance; filter May 19–Aug 17 2026
Revenue by month (May, Jun, Jul, Aug 2026)	Yes	TODO	Monthly pivot of succeeded charges with <code>metadata.app = astrolink</code>
Total costs (excl. marketing)	Yes	TODO	Hosting, LLM API, Daily, Stripe fees, contractors, tools
Marketing & customer acquisition spend	Yes	TODO	Ads, sponsorships, promo discounts; disclose even if \$0
Related-party revenue (separate)	Yes	TODO	Team, family, pre-existing relationships — do not hide
Arms-length third-party customers	Yes	TODO	Distinct paying emails/users with short personas

CHECKBOX — REVENUE PACK

- ☐ Stripe export CSV saved (`submission-pack/finance/stripe-payments.csv`)
- ☐ Monthly table filled (Section 6 template)
- ☐ Related-party list with amounts and reason codes
- ☐ Cost one-pager with line items
- ☐ Marketing spend line (even \$0)
- ☐ Screenshot: Stripe production (or clearly labeled test vs live — live preferred for claims)
- ☐ Currency conversions documented if any non-USD
- ☐ Comp grants / \$0 sessions excluded from “revenue” or labeled free

Integrity rule: Judges may request customer contact info. Only include people who consented to be referenced.

2.4 User evidence

Item	Required	Status	Source
Number of individual users	Yes	TODO	Supabase <code>users</code> / auth counts; early-access signups; waitlist
High-level breakdown of who users are	Yes	TODO	Students, operators, analysts, career switchers, geo
Testimonials / feedback	Yes	TODO	Session reviews, emails, Path Assessment feedback (consented)
Related-party users noted	Yes	TODO	Seed/demo accounts not counted as customers

CHECKBOX — USERS

- ☐ Headcount: registered users, waitlist, paying customers (separate numbers)
- ☐ Persona breakdown (table)
- ☐ 3–10 short testimonials with permission
- ☐ Exclude demo emails (`carlos@astrolink.ai`, etc.) from “customer” claims

2.5 Product running evidence (AI-Native)

Item	Required	Status	Source in AstroLink
Agent execution logs	Yes	PARTIAL	<code>audit_log</code> + <code>LLM_DECISION</code> via <code>GET /api/admin/audit-logs/export</code>
API usage records	Yes	PARTIAL	Google AI Studio / Gemini usage; OpenAI if used (disclose)
Dashboards / screenshots	Yes	PARTIAL	Admin metrics, mentor dashboard, mentee brief UI
Continuous production ops	Yes	PARTIAL	Production webhooks Stripe + Daily; cron video expire

CHECKBOX — AI OPS EVIDENCE

- ☐ Export JSON: `astrolink-xprize-decisions-YYYY-MM-DD.json` (schema `t8-v1`)

- ☐ Confirm majority of production decisions show `provider: "gemini"`
- ☐ Screenshot Google AI / Gemini usage for contest window
- ☐ Screenshot admin audit or metrics page
- ☐ One annotated screenshot sequence of APX-02 brief + APX-03 recap + APX-06 captions
- ☐ Note E2E stubs are **not** production evidence (`E2E_STUB_LLM` must be off in prod)

2.6 Organization / team

Item	Required	Status	Notes
Entrant type (individual / team / org <25 employees)	Yes	TODO	Confirm eligibility
Representative authorized	Yes	TODO	One Devpost submitter
Corporate ID (if organization)	If org	TODO	EIN / registration doc as required
Team member names	Recommended	TODO	Credit builders for publicity

3. Product fact sheet (for judges and video)

3.1 One-liner

AstroLink is a paid aerospace expert network: anyone can discover and book verified operators for live 1:1 sessions, while Gemini-powered agents run matching (when needed), dual pre-session briefs, post-session synthesis, bilingual captions/recap, and trust triage.

3.2 Category thesis

Category	Professional Services Access
Problem	High-stakes aerospace knowledge is locked behind personal networks, opaque consulting, and conferences most buyers cannot access
Product	Marketplace + AI session operating system
Why not Education-only	Primary sale is expert access (time), not coursework. Path Assessment supports discovery.

3.3 Stack (submission “Built with”)

Layer	Choice	Judge note
LLM	Gemini via <code>@google/genai</code> (<code>LLM_PROVIDER=gemini</code>)	Required path for contest
Optional LLM	OpenAI fallback	Allowed; do not let it silently dominate production
App	Next.js 16 (App Router) on Vercel	Production: astro-link.space
Data	Supabase (Postgres, auth, storage)	Hosted project
Payments	Stripe PaymentIntents (<code>metadata.app=astrolink</code>)	Immediate capture at launch
Video	Daily.co private rooms + webhooks	Transcription for recap when enabled
Design tooling	Google Stitch (Chris campaign)	Google stack story
Email	Resend	APX-08

3.4 AI agents (production)

Be precise in the video: **LLM decision agents** vs **workflow agents**.

Agent	Role	LLM?	Key decision for judges
APX-01 Booking	Match expert from goals when mentor not preselected; orchestrates book	Yes (match)	Expert selection
APX-02 Briefing	Dual mentee + expert pre-session briefs	Yes	Prep both sides
APX-03 Session	Post-call summary + actions from transcript	Yes	Capture session value
APX-04 Compliance	Intake / transcript flags (ITAR-adjacent keywords)	Yes	Trust triage
APX-06 Translation	Live captions + localized recap (aerospace glossary)	Yes	Cross-language access
APX-08 Notifications	Confirmation email + calendar	No (workflow)	Ops automation
APX-09 Reviews	Moderate / publish session feedback	Yes	Trust at scale
APX-10 Path Assessment	Free readiness report → upsell	Yes	Funnel + discovery

Code anchors

- LLM + audit: `src/lib/llm.ts`, `src/lib/llm-audit.ts`
- Export: `src/lib/xprize-decision-logs.ts`, `src/app/api/admin/audit-logs/export/route.ts`
- Agents: `src/services/agents/*`

Honesty note for judges: Most buyers pick a named expert. Matching runs when no mentor is selected. Still show `match_reason` / ranking value; do not claim every booking is AI-matched unless product behavior changes.

3.5 Paid surfaces (business model)

Offer	Price shape	Status
Live 1:1 session	Expert rate / duration (server-authoritative)	DONE
Chris campaign sessions	Campaign menu + referrer tiers	DONE
Pre-call brief add-on (legacy SKU path)	Bundled into live in practice	PARTIAL
Personalized video request	Guest checkout async video	DONE
Space Path Assessment	Free AI report	DONE
Written expert review of assessment	\$50 tripwire	DONE
Comp 15-min grants	Ops \$0 sessions	DONE (not revenue)

Sustainability narrative (honest): platform captures payment at launch; mentor Connect payouts deferred / manual settlement documented in ops plans.

3.6 Public product routes (demo map)

Route	Purpose
/	Landing + expert teaser + Path Assessment CTA
/experts	Full directory
/experts/[slug]	Profile, book, video request
/assessment	Space Path Assessment funnel
/booking	Checkout / session booking
/talk-with-chris	Named expert campaign landing
/dashboard/mentee	Briefs, join, recaps
/dashboard/mentor	Sessions, earnings, listing
/session/[bookingId]	Daily room + captions
/early-access	Waitlist (if APP_MODE=waitlist)

4. AI-Native Operations checklist (score driver)

4.1 Production lock (do before any evidence export)

Check	Status	Action
<code>LLM_PROVIDER=gemini</code> on Vercel Production	TODO	Verify in Vercel env; avoid OpenAI default if <code>OPENAI_API_KEY</code> set without explicit provider
<code>GEMINI_API_KEY</code> present in Production	TODO	
<code>E2E_STUB_LLM</code> not true in Production	TODO	Stubs invalidate evidence
<code>SKIP_STRIPE_PAYMENTS</code> false / un- set in Production	TODO	Hard-disabled in prod builds by design — still verify
<code>APP_MODE</code> intended surface	TODO	Full app for judge demo path, or document wait-list + campaign
Stripe live vs test	TODO	Live keys only in Production env; never in Preview
Daily webhooks production	TODO	<code>meeting.ended</code> (+ transcript events if claiming grounded recap)
Transcription storage if claiming durable transcripts	TODO	See <code>docs/how-to/daily-transcription-storage-preflight.md</code>

CHECKBOX — PRODUCTION LOCK

- ☐ Vercel Production env screenshot (redact secrets)
- ☐ One real production booking generates `LLM_DECISION` rows with `provider: gemini`
- ☐ Export sample attached to pack
- ☐ No judge demo relies on `ENABLE_DEMO_AUTH` unless labeled “demo auth for testing only”

4.2 Decision log export procedure

1. Sign in as admin on production (or staging with real LLM if production not ready — **prefer production**).
2. Call `GET /api/admin/audit-logs/export?limit=500&since=2026-05-19T00:00:00Z`
3. Save file as `submission-pack/ai/astrolink-xprize-decisions-<date>.json`
4. Spot-check: `schema_version` = `t8-v1`, `decision_count` > 0, agents APX-01/02/03/06/09/10 present if claimed
5. Optional: admin UI list `GET /api/admin/audit-logs` for screenshots

CHECKBOX — T8

- ☐ Export JSON saved
- ☐ Count of Gemini vs OpenAI decisions tabulated
- ☐ Redact any accidental PII in payload summaries before sharing publicly
- ☐ Update `docs/d1-implementation-plan.md` T8 status to match reality (docs currently lag)

4.3 Golden path for video (AI visible on screen)

Recommended single story (under 3 minutes of footage):

1. Path Assessment → personalized Gemini report (APX-10)
2. Book expert with goals → dual brief on mentee dashboard (APX-02)
3. Join session → show live captions if bilingual story (APX-06)
4. Post-session recap actions (APX-03)
5. Cut to decision log / export (ops evidence)

Optional B-roll: directory, Stripe success, mentor dashboard, review moderation (APX-09).

CHECKBOX — VIDEO PRODUCTION

- ☐ Script timed to ≤2:50 (leave buffer)
- ☐ Screen recording 1080p, no private keys visible
- ☐ Face/talking head optional; product must be primary
- ☐ Uploaded public; link in Devpost
- ☐ No unlicensed music / third-party trademarks without permission

5. Business Viability checklist (score driver)

5.1 Revenue table (fill before submit)

Month	Arms-length revenue (USD)	Related-party (USD)	Paying customers (count)	Notes
May 2026 (from May 19)				
June 2026				
July 2026				
August 2026 (through Aug 17)				
Total				

Cost category	Amount (USD)	Description
Hosting (Vercel, etc.)		
Supabase		
Daily		
Gemini / LLM API		
Stripe fees		
Email (Resend)		
Contractors / tools		
Total costs (excl. marketing)		
Marketing & CAC		Even if \$0

5.2 Unit economics (short narrative)

Metric	Value	Notes
Typical live session price		Chris vs general roster
Platform take / fee model		Immediate capture; Connect deferred
Expert settlement method		Manual payouts at launch
Free funnel	Path Assessment	Conversion to book / \$50 written review
Gross margin drivers		LLM cost per session, Daily minutes

CHECKBOX — VIABILITY STORY

- ☐ Numbers table complete and consistent with Stripe export
- ☐ Related-party disclosed
- ☐ Sustainability paragraph written (not “we’ll figure out later”)
- ☐ At least one non-related-party paid customer documented if claiming commercial traction
- ☐ Comp grants excluded from revenue

5.3 User & GTM evidence

Channel	Status	Evidence to attach
Chris Sembroski campaign	PARTIAL	<code>/talk-with-chris</code> , slot metrics, referrers
Waitlist / early access	PARTIAL	Supabase <code>early_access_signups</code>
Path Assessment funnel	PARTIAL	<code>spa_*</code> analytics events, assessment rows
Expert activation	PARTIAL	Invite / claim flows
Press page	PARTIAL	<code>/press</code> content

CHECKBOX — GTM

- ☐ User count snapshot dated
- ☐ Campaign metrics export (admin Chris metrics if available)
- ☐ Path Assessment volume + conversion notes

- ☐ 1–2 non-Chris experts with completed sessions (strengthens platform thesis)

6. Category Impact checklist

Question judges ask	Your answer (draft)	Status
Who is “everyday people” here?	Students, early-career operators, analysts, founders outside aerospace networks	TODO polish
How is access redefined?	Named experts + escrow + AI prep/synthesis/translation vs opaque networks	PARTIAL
Path to 100k+ impact?	Not 100k astronaut calls — Path Assessment + bilingual access + cohort pilots + adjacent verticals	TODO polish
Why aerospace first?	Domain hardness (compliance, scarcity, high stakes) proves Professional Services Access	DONE thesis
Credible scale?	Roster depth, languages, completed sessions, orgs	PARTIAL

CHECKBOX — IMPACT

- ☐ One paragraph “redefines access” without overclaiming scale
- ☐ Metrics that show breadth (assessments, locales, sessions) not only celebrity
- ☐ Optional: education adjacency called secondary, not competing category claim

7. Eligibility & compliance gates

Rule	Status	Action
Entrant age / org <25 employees	TODO	Confirm
Not in OFAC-restricted jurisdiction	TODO	Confirm
No conflict with Sponsor/Admin preferential support	TODO	Confirm
Original work / IP owned by entrant	PARTIAL	Third-party SDKs licensed (Stripe, Daily, Supabase, Google) — OK if authorized
Disclose pre-existing templates/boilerplates	TODO	Next.js app scaffold, shadcn patterns, etc.
Third-party data authorized	PARTIAL	Expert likeness/bios need rights; media in pub-lic/
English submission	DONE	
Response window for verification (2 business days)	TODO	Staff inbox monitored Aug 18–Sep 15

CHECKBOX — LEGAL/ELIGIBILITY

- ☐ Eligibility statement written
- ☐ Expert media rights confirmed for gallery/video
- ☐ Privacy: users told if testimonials shared with judges
- ☐ Team representative named

8. Judge testing package

Judges may or may not deep-test. Still provide a frictionless path.

8.1 Credentials & mode

Item	Value / instruction	Status
Base URL	https://astro-link.spaceSMARTPANTS_RESERVED_1952SMARTPANTS_RESERVED_1953	DONE
Judge login	Create dedicated accounts; avoid production admin secrets in public text	TODO
Role matrix	mentee / mentor / (optional admin read-only)	TODO
Payment	Stripe test card or pre-provisioned booking if live-only	TODO
LLM	Real Gemini (no stubs)	TODO
Dual device	Optional: <code>docs/how-to/demo-dual-device-video.md</code>	DONE doc

Do not put production service-role keys or webhook secrets in Devpost.

8.2 Golden path script (copy into Testing Instructions)

1. Open production URL.
2. Sign in as judge mentee.
3. Complete Path Assessment **or** open `/experts` and pick a listed expert.
4. Book a short session (or use provisioned booking).
5. Open mentee dashboard → open dual AI brief.
6. Join `/session/[id]` (or view completed recap if time-shifted demo).
7. Optional mentor login to join same room.
8. Optional admin: download decision log export.

Fallback if live video blocked: pre-recorded clip in submission video + static booking with completed recap already on account.

CHECKBOX — TESTING PACK

- ☐ Accounts created and smoke-tested within 48h of deadline
- ☐ Instructions ≤1 page

- ☐ Known failure modes documented (transcription storage, join window, lead time)
- ☐ Contact email for live demo request

8.3 Internal rehearsal (before submit)

Use: `docs/how-to/video-session-demo.md`, `docs/tutorial/first-video-session.md`,
`docs/tutorial/bidirectional-live-captions.md`.

- ☐ Cold run of golden path twice without engineer help
- ☐ Capture backup screen recordings if live fails during judging
- ☐ Verify join window / lead-time rules won't block judge same-day book

9. Repo & engineering readiness (support, not a scoring criterion)

Judges may open the repo. Present a clean story.

Item	Status	Notes
README XPRIZE section	DONE	Category, agents, links
VERSION / CHANGELOG	DONE	0.12.0.0 Path Assessment
Decision log export	DONE (code)	Package evidence still TODO
E2E golden path	DONE	Playwright; not a substitute for production proof
Env example documents Gemini primary	DONE	<code>.env.example</code>
Dual booking paths (Chris vs generic)	PARTIAL debt	Prefer one path in demo video
D1 plan T8 checkbox	STALE	Code exists; docs say "Not started" — fix before judges read docs

CHECKBOX — REPO HYGIENE FOR JUDGES

- ☐ README "how to run" works for interested technical judges
- ☐ No secrets in repo

- ☐ Private repo invites sent if needed
- ☐ Optional: short `docs/xprize/README.md` pointer to this checklist

10. Submission pack folder layout

Create before deadline (gitignored if it contains PII/financials, or store offline):

```
docs/xprize/submission-pack/
  README.md                # index of files + owners
  narrative/
    devpost-description.md
    tagline.txt
    built-with.txt
  video/
    script.md
    final-url.txt
    raw-recordings/        # optional, offline
  finance/
    revenue-by-month.md
    costs.md
    marketing-spend.md
    related-party.md
    stripe-export.csv
    screenshots/
  users/
    user-counts.md
    personas.md
    testimonials.md        # with consent flags
  ai-ops/
    astrolink-xprize-decisions-*.json
    gemini-usage-screenshots/
    agent-ui-screenshots/
  testing/
    judge-instructions.md
    credentials.private.md  # DO NOT commit if secrets
  eligibility/
    entrant-type.md
    team.md
  gallery/
    01-landing.png
    02-assessment.png
    03-booking.png
    04-brief.png
    05-session.png
    06-recap.png
    07-decision-export.png
```

CHECKBOX — PACK COMPLETENESS

- ☐ Folder created
- ☐ All BLOCKER items from Section 11 closed
- ☐ Second person review of numbers vs Stripe
- ☐ Devpost draft saved before deadline buffer (48h recommended)
- ☐ Final submit click before 2026-08-17 1:00 PM PT

11. Priority backlog (what to do next)

BLOCKERS (do first)

1. **Arms-length revenue pack** — monthly table + Stripe export + related-party split
2. **User evidence pack** — counts, personas, consented quotes
3. **Gemini production lock** + decision-log export with `provider: gemini`
4. **≤3 minute public demo video** covering viability + AI decisions + category
5. **Judge testing instructions** + working credentials
6. **Repo access** for Devpost/XPRIZE test addresses if private

HIGH (strong runner-up / category prize)

7. Path Assessment conversion stats (free → paid)
8. Non-Chris expert completed paid sessions
9. Gallery screenshots polished
10. Written description peer-reviewed
11. Cost + marketing spend one-pager

MEDIUM (polish / risk reduction)

12. Align D1 T8 docs with shipped export
13. One golden path only in video (avoid dual-product confusion)
14. Backup recordings for judging period
15. Monitor verification email 2-business-day SLA

LOW (post-submit or nice-to-have)

16. Dual booking UI consolidation (code quality, not prize)
 17. Stripe Connect restore for sustainability narrative v2
 18. Broader Google Cloud (Vertex/Cloud Run) — optional story only
-

12. Final submit-day checklist (print this page)

T-48 hours

- ☐ Revenue numbers frozen and dual-checked
- ☐ Video final cut uploaded; link works in incognito
- ☐ Decision log export refreshed from production
- ☐ Judge accounts re-tested

T-24 hours

- ☐ Devpost draft complete (all required fields green)
- ☐ Gallery + cover uploaded
- ☐ Testing instructions final
- ☐ Team representative available through judging period

T-2 hours

- ☐ Production site health check (landing, auth, book, dashboard)
- ☐ No deploy that risks golden path
- ☐ Related-party and marketing spend fields filled (even \$0)

Submit

- ☐ Click submit on Devpost before **2026-08-17 1:00 PM PT**
- ☐ Screenshot confirmation page
- ☐ Archive submission-pack zip offline

Judging period

- ☐ Inbox monitored for verification requests (2 business days)

- ☐ Live demo ready if called
- ☐ Financial docs ready for deeper diligence

13. One-page score self-audit

Rate honestly 1–5 before submit. Grand prize contenders are usually 4–5 on all three.

Criterion	Self-score (1–5)	Weakest evidence	Next action
Business Viability			
AI-Native Operations			
Category Impact			

Minimum bar to submit with pride: product works, Gemini in production, honest finance table, clear category story, watchable video.

Minimum bar for grand prize contention: meaningful arms-length revenue, continuous AI decision volume, multi-user proof beyond team, video that makes a non-technical judge “get it” in 90 seconds.
